Market review

The TAIEX Total Return Index (TAIEX) increased 1.5% in August, despite a correction earlier in the month following developing tensions in North Asia. August was the ninth consecutive monthly rise since December 2016. Foreign investors became net sellers in August while local investors were active buyers. August was the first month in 2017 during which industrial stock and non-technology companies outperformed technology companies. The transportation and paper sectors also outperformed, driven by higher selling prices and better than expected results.

Fund update

The Fund outperformed the TAIEX by 0.6% in August. It was a strong month for the industrial sector, led by the container shipping operator Evergreen Marine Corp. (Taiwan) Ltd. on higher freight rates, and Hiwin Technologies Corp. on positive outlook and full production capacity until the first quarter of 2018. Stock selection in the semiconductor sector also performed well, including Silergy Corp. and Macronix International, thanks to better than expected results. Tripod Technology Corp. continued to benefit from improving sales. In contrast, Nien Made Enterprise Co., Ltd. was the biggest detractor from performance on softer than expected margin expansion. Aspeed Technology, Inc.'s stock plateaued following weaker earnings. Ennoconn Corp. in the computer & peripheral equipment sector underperformed due to low margins following the acquisition of S&T AG. The Fund also took some profits in Merry Electronics Co., Ltd. after rallying over 100% this year in anticipation of the Apple Inc. product cycle.

The Fund made no change to its core investment approach and remained focused on quality companies with strong growth profiles. The Fund continues to prefer consumer growth names with sustainable franchises, including those in the sportswear industry and automation parts within the other electronic sector. Additionally, The Fund remained overweight in technology companies in the Apple Inc. supply chain and in the cloud, internet-of-things, gaming and semi-conductor sectors. The Fund remained underweight in the telecommunications and basic materials sectors.

Outlook

The market could see a healthy consolidation after a good run since the start of the year and a potential rotation from the outperforming technology sector into the non-technology sector. The launch of the new iPhone 8 takes center stage, and the Apple Inc. supply chain companies will be under the spotlight. Generally, strong foreign inflows, continuing attractive valuations and dividend yield should provide good support for the market.

Important Information

This document is issued and approved by JF International Management, Inc. ("JFIMI"), as investment advisor of The Taiwan Fund, Inc. (the "Fund"). JFIMI is an investment advisor registered with the US Securities and Exchange Commission. Certain information herein is believed to be reliable but has not been verified by JFIMI. JFIMI makes no representation or warranty and does not accept any responsibility in relation to such information or for opinion or conclusion which the reader may draw from this newsletter.

The Fund is classified as a diversified investment company under the US Investment Company Act of 1940 as amended. It meets the criteria of a closed end US fund and its shares are listed on the New York Stock Exchange. JFIMI has been appointed investment advisor to the Fund.

This newsletter does not constitute an offer of shares. Closed-end funds, unlike open-end funds, are not continuously offered. After the initial public offering, shares are bought and sold on the open market through a stock exchange. JFIMI, its ultimate and intermediate holding companies, subsidiaries, affiliates, clients, directors or staff may, at any time, have a position in the market referred to herein, and may buy or sell securities, currencies, or any other financial instruments in such markets. The information or opinion expressed in this newsletter should not be construed to be a recommendation to buy or sell any security, including the securities, commodities, currencies or financial instruments referred to herein.

Portfolio holdings are subject to change daily.

It should not be assumed that any of the securities transactions or holdings discussed here were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

Investing in the Fund involves certain considerations in addition to the risks normally associated with making investments in securities. The value of the shares issued by the Fund, and the income from them, may go down as well as up and there can be no assurance that upon sale, or otherwise, investors will receive back the amount originally invested. There can be no assurance that you will receive comparable performance returns. Movements in foreign exchange rates may have a separate effect, unfavorable as well as favorable, on the gain or loss otherwise experienced on an investment. Past performance is not a guide to future returns. Accordingly, the Fund is only suitable for investment by investors who are able and willing to withstand the total loss of their investment. In particular, prospective investors should consider the following risks:

Discretionary investment is not risk-free. The past operating performance does not guarantee a minimum return for the discretionary investment fund. Apart from exercising the duty of care of a prudent adviser, JFIMI will not be responsible for the profit or loss of the discretionary investment fund, nor guarantee a minimum return.

- It should be noted that investment in the Fund is only suitable for sophisticated investors who are aware of the risk of investing in Taiwan and should be regarded as long term. Funds which invest in one country carry a higher degree of risk than those with portfolios diversified across a number of markets.
- Investment in the securities of smaller and unquoted companies can involve greater risk than is customarily associated with investment in larger, more established, companies. In particular, smaller companies often have limited product lines, markets or financial resources and their management may be dependent on a smaller number of key individuals. In addition, the market for stock in smaller companies is often less liquid than that for stock in larger companies, bringing with it potential difficulties in acquiring, valuing and disposing of such stock. Proper information for determining their value, or the risks to which they are exposed, may not be available.
- Investments within emerging markets such as Taiwan can be of higher risk. Many emerging markets, and the companies quoted on their stock exchanges, are exposed to the risks of political, social and religious instability, expropriation of assets or nationalization, rapid rates of inflation, high interest rates, currency depreciation and fluctuations and changes in taxation which may affect the Fund's income and the value of its investments.
- The marketability of quoted shares may be limited due to foreign investment restrictions, wide dealing spreads, exchange controls, foreign ownership restrictions, the restricted opening of stock exchanges and a narrow range of investors. Trading volume may be lower than on more developed stock markets, and equities are less liquid. Volatility of prices can also be greater than in more developed stock markets. The infrastructure for clearing, settlement and registration on the primary and secondary markets may be undeveloped. Under certain circumstances, there may be delays in settling transactions in some of the markets.
